Stop friendly fire chapter 11 pdf full

You can fly with any means at your disposal. This was an uncommon experience both underground and on the surface. A is the most common, and it works on most items you have around your house, like wood, paper and fabric. The Second Advent of the Sun God - 1>The level 8 Elite Desert Ghost looked half scorpion and half spider, and was a huge 20 meters tall. It didn't think it could catch Jin, so it hoped that if it shot lava plumes in every which way, then one of them would hit him!But against Jin, that was the worst possible choice. First, Lee Shin Woo quickly pulled out his greatsword. Fire extinguishers come in a variety of sizes. Always spray towards the base of the fire. you'll also want to make sure someone in the home calls the fire department and make sure you're not breathing in toxic smoke while you extinguish the fire. The fallen sand had disturbed the monsters underground; these infuriated monsters had begun to mobilize!Lv8 Solar ScarabThe Solar Scarabs were encased in shells and their wings rattled unpleasantly as they flew over, you'll also want to make sure you're not putting others at risk by alerting anyone in your home that there's a fire before you attempt to put it out. Then, the greatsword released wind blades at the Desert Ghost's face!Gyaaaaah!Even while flustered, the Desert Ghost quickly fused the wind and heat near its face and formed a shield to protect itself. However... No, the images flowing through his head were just as preposterous. "I told you, I won't sprout wings!"The image is good enough. From a purely external view, they looked like stag beetles, but each one of them were more than 3 meters tall and they were obviously level 8.Lee Shin Woo and Jin were instantly surrounded by dozens of level 8 monsters. Immediately after, the lava around it began to boil over!Kyahaaaaaaaahk!That's no 'Desert' Ghost. Jin knew he was distorted, as he felt relief in that. It didn't matter that his opponent was a level 8 elite. D is for working with flammable metals and is only usually found in factories. The higher your agility, the quicker and more safely you can fly.]When he had first acquired the Fly skill, it was low rank level 8. He would focus Steel Heart on his body and create a new, exterior armor... "Like the design?"Yeah. The serious injury caused the surrounding wind to momentarily stop, and the previously uplifted sand to fall.It screamed, and Lee Shin Woo knew he had to take it down quickly; if not, then its scream could attract other monsters over. Disguise!""S-Steel Heart!"When the level 9 Disguise skill was used on himself, it was absolute. Jin, who'd gotten a feel for flying, ignored the hot wind, as well as the rotating sand storm within it, and circled around the Desert Ghost with ease. Of course, the level was meaningless, as he couldn't even fly back then, but it had went up by two levels all of a sudden and reached the intermediate level.At that moment, Jin instinctively understood how to move the wings Lee Shin Woo had designed for him. Lee Shin Woo couldn't defy gravity and began to fall, but even then, he remained calm. Just focus on killing it!"The Desert Ghost was pissed, as it had sustained a grievous injury on its face. If an individual isn't capable of using a skill, then they wouldn't learn it, but why... You now have an unclear understanding of the fundamentals of flying. The rotating sand, heat, and wind mixed together and changed into something unknown, like lava. However, he was soon able to get a hold of himself, as images and messages flowed into his head through the Assimilation skill. It felt like all those suffocating feelings he had been feeling on the surface were disappearing. At that moment, Lee Shin Woo's greatsword sliced through the shield like paper and burrowed into its shell!"Thunder Strike!"Lee Shin Woo unleashed Bursting Thunder's true power, causing its forehead to explode. It's best to choose one you can handle, as well as what's appropriate for you space. I told you, I can't do it!"To be honest, Jin had once thought that he could sprout wings. That guy's opening its mouth!"Ki, Kihiii... Because of that, it wasn't difficult for him to attach wings to his body. It should be kept by an exit in an easy-to-reach space. If Jin could do it, then Lee Shin Woo could too. A portion of the Desert Ghost's typhoon, which consisted of the sand, the wind, and the heat, was destroyed.However, that wasn't the end, Jin questioned and completely gave up on their dream (it was really more Lee Shin Woo's dream) of flying. However, when it was used on other people, it was quite strict, especially for things that didn't originally exist... In conclusion, with enough spatial awareness (front to back, left and right, and top to bottom), all one needed to do was control their body!"Alright, then... Sweep the nozzle from side to side as you spray. The National Fire Protection Association recommends having one on each floor of your home, along with one in your garage. Maintaining Your Fire Extinguisher When It's Not in UseWith any luck, you'll never actually need to use your fire extinguisher, and it can be easy to forget about it if it's tucked away in a cabinet or pantry. While children should never use a fire extinguisher, it's a good idea to take some time to teach other adults in your home how to use it in case of an emergency. His Rebellion skill had increased his stats by almost 30% and adding the speed of Jin's flight, as well as Zenon's ability (which nullified the Desert Ghost's fire shield), Lee Shin Woo managed to land a single powerful strike with Bursting Thunder.Plus."Thorn Shadow!"Kyahaaaaaaahk!Critical Hit!Shadow greatswords sprouted from the greatsword's edge and flailed around inside its head. If you want to add a fire extinguisher to your house, learn how to choose the right one and how to use it.The Five Types of of Fire ExtinguishersWhen choosing a fire extinguisher, the first thing you need to know is that there are five different types: A, B, C, D and K. If it has, you may need to wipe it down. Do you think you can do it, Shin Woo? Kyaaaaaaaah!Although the Desert Ghost had sucked up all the sand, it wouldn't allow any bugs to buzz around in the air.It marked its target and opened its mouth. Huh?"Jin couldn't create wings, even if he used his 'Steel Heart' ability. For example, if you are injured or the fire extinguisher is too heavy or awkward for you to use, you're putting yourself at risk by attempting to use it. Jin remained calm as well, thinking 'Shin Woo will do something about it', but... They wouldn't be able to maneuver properly; at best, they would be able to hover.Jin was a sprinter in the past, so he had excellent motor skills. Finally, it's best to only use an extinguisher on a fire that is small or contained to a space like a garbage can, pan or sink.PASS Method for Using a Fire ExtinguisherNow that you know when to use a fire extinguisher, it's time to learn how to use it. Replace your fire extinguisher every 10 years.When Should You Use a Fire Extinguisher?When you have a fire in your home, you have to think quickly to stay safe, and that means knowing when it's appropriate to try to use your fire extinguisher. In the past, when Lee Shin Woo had used Bone Reinforcement on him with winged monsters' bones, Jin was lucky enough to learn the 'Fly' skill.Of course, he was really flustered back then, and tried his best to hide the truth from Lee Shin Woo. If hell existed, then this was probably what it was referring to.'Hey, what are you going to do about this?'Jin spoke as though they could run away easily (due to his newly gained wings), but Lee Shin Woo couldn't contain his smile."If we play our cards right, you may be able to reach level 8 too.""I was stupid to ask."Why did he even ask, when he already knew how Lee Shin Woo would respond!? Its wind couldn't even catch Jin's shadow!Although they were penetrating through a level 8 elite's defenses (the sandstorm and hot air), they were still unscathed. one could say that creating wings out of thin air was pretty much impossible.Of course, Jin possessed the Steel Heart skill, which coated his body in a steel-like substance using mana. Jin followed up on Lee Shin Woo's wind blades by picking up the pace. But releasing wind like this wouldn't do any good. Make sure the nozzle is aiming away from you. Heugyak!"It was only for a brief moment, but Jin was flustered and confused. Hurry up.""Mmmm...!"However, Lee Shin Woo's images were much clearer than his own attempts. The greatsword, which emanated a red light, let out a crackle and was covered in golden lightning."Suck out all of its heat!"I can't suck out all of it. Unused extinguishers lose their pressure over time, and are typically no good after 10 to 12 years. While they plummeted to the ground, Jin was somehow able to use his Magic Breath.Due to their near perfect Assimilation, Jin was able to store Lee Shin Woo's High Rank Wind with his Magic Breath!"I did it!"At the end of his desperate training, Jin had become capable of discharging Magic Breath from anywhere on his body. The design's perfect. CCO/Antranas/Pixabay Each year in the United States, fires in homes and apartments injure or kill thousands of people and cause billions of dollars worth of damage. K is for working with certain types of cooking oils and is usually only found in restaurants and commercial kitchens. Aim low. Even so, it would be impossible for him to control something he'd never had in the past. They are: Pull the pin to unlock the device. Jin 'jet blasted' it and quickly retreated. I can do something about that shield!The wind blades crashed into the monster's shield and disappeared; they blew up right in front of its face, so the monster briefly closed its eyes and stiffened. C works on electrical fires that may occur at outlets and within cords to appliances and tools. They began to float. Why? Now!Kyahaaaaaah!Heup!"Lee Shin Woo forcefully swung his greatsword, his blade emitting a brilliant red light. It's really something every home should have on hand. The Magic Breath flowed out of his toes first, and then traveled along the pipes and spurted wind out of all the holes connected to them. Calmly thinking about it, he was the strange one, as he was thinking about something so preposterous while they were falling down. He didn't look for a pattern; he instead saw through the attacks with his frightening reflexes and senses in order to avoid them. [Kushaaaaaaaah!Kyahaaaaaahk!]Then, Lee Shin Woo suddenly felt ominous. I'm going!"Once Jin stepped in the air, they charged at the Desert Ghost with explosive acceleration!The Desert Ghost attempted to eviscerate them by making use of the hot air around it; it divided the air into dozens of wind blades and rushed towards them, but Jin avoided them with ease and continued to charge forward. The fire extinguisher is still in an easy-to-reach spot in your home The pressure on the gauge hasn't gone too high or low The nozzle and hose are in good shape and free from rust, dents and other damage Dirt or grease hasn't built up on the extinguisher. At least once a year check to make sure:The fire extinguisher is still in an easy-to-reach spot in your home The pressure on the gauge hasn't gone too high or low The nozzle and hose are in good shape and free from rust, dents and other damage Dirt or grease hasn't built upon the extinguisher. Even if a Pegasus were to appear, Jin was confident he could match it in flight.The Intermediate Fly skill has become Lv3. But this would result in the same outcome as when he had tried it by himself. This sense of unity could only be felt now. Fighting while running on the ground and flying in the air are completely different.""Ha, of course they are."Just a short while ago he'd been so unconfident, but now... Rather than fight, it was more like teleportation!The clump of lava passed where they had just been and flew far away; it hit the dungeon's wall and melted it. Five-pound is ideal for your kitchen or laundry room, while 10 pounds is perfect for a garage, basement or areas where a fire may start without you noticing it at first. I was going to attempt this after I'd become more accustomed to the Disguise skill but... "There's no way it'd work with just your Disguise skill... The wings fluttered, and the finely controlled wind was sprayed out.[Gugyaaaaaah!]"Nice work, Jin!"Just wait until after the battle!"All of Jin's superlative speed was concentrated entirely into his flight; at that moment, they, who had been flying round and round, disappeared instantly and reappeared in the opposite direction. This time though, Lee Shin Woo had designed the wings, all of the details... And the power system as well.And through the simultaneous activation of Lee Shin Woo's Disguise and Jin's Steel Heart skills, the image became a reality!"Jeez, this... He wasn't sure if they could truly fly yet, but they could at least float!But the wind was too chaotic, so they were immediately overturned within the air."Ugyak!"Control it! Keep your balance... Even the sandstorm, which had fused with the wind, was of no use. Magic Breath!"Through the combination of the Disguise and Steel Heart skills, Jin looked outwardly like a steel Pegasus. He and Lee Shin Woo were the only two people here. It was so striking that he would believe it if someone told him that this was the boss!You are facing a higher leveled foe! The Rebellion skill activates, and all stats are increased by 16%. But then... "Ah" His Flying skill activated.[The Low Rank Fly skill has become Lv10 and evolves to the intermediate level! Agility has increased by 75. On the contrary, it worried Lee Shin Woo.However, Lee Shin Woo was already connected to Jin. But in order to attack it, Lee Shin Woo would have to go face-to-face with the shield of hot wind that covered its body.He got a signal from Jin, inwardly nodded his head, and gripped his greatsword. B works best on combustible items, like grease or paint. Jin sighed and felt more at ease for some reason. Agility has increased by 60.]"Alright, let's go!"Once he fluttered his wings, the two became one, and they eventually became a streak of light.The level 8 dungeon was nothing more than a date spot to Jin now. Make sure you have a clear path to get out of the room or building in the event that you are unable to put out the fire. But it didn't matter.'It's a disease.'Jin grinned and unfolded his steel wings. It had lost its balance, and Lee Shin Woo absorbed the typhoon's energy into his greatsword. From an outsider's point of view, it may look like a toothpick against a natural disaster, but at the moment of impact, the natural disaster was the one that folded. He failed."No, you can do it. is really embarrassing!"With the slightest of movements, Jin could easily control the tough, huge steel wings, while also having firm abdominal armor to support them.These wings should allow him to 'slide down a slope', but it obviously didn't end there. Everything culminated into his relaxed sense of calm. The number is meant to signify how well that particular fire extinguisher does its job.Tips for Selecting a Fire ExtinguisherOne you know the five types of extinguishers, you probably have a good idea of what you need for your home.
